Mr. Donald C. Norseth

State Engineer - Stage 118-2375

Dear Sir,

I went to Glendale and checked  
on Mr. C.W. Brinkerhoff's ditch.  
He has no measuring gate,  
he was not home, but I went up  
his ditch to the head and there  
was nothing.

Cornell Chamberlain is having  
trouble with Henry Carroll up in  
Lydia's Canyon, over their water.  
Cornell has 1.54 c.f.s of water  
against Henry's .32 c.f.s. Henry is  
above Cornell, and has put a pad-  
lock on his gate so Cornell cannot  
get up to get the water when his  
tarn comes. This canyon is just  
above Glendale, you can see in your  
cree Book what water it is  
Cornell owns the John C. Smith water  
and Henry Carroll, the John H. Watson water

This water is also under  
East fork of the Virgin River.  
Should I do something about it?  
The way their temporary agreement  
was, they should each have 15 days  
water each month, But Cornell informs  
me that he cannot get the water for  
his turn unless he walks about 6 mi  
because of the gate being locked and  
they do not have a key.

Cornell has appealed to me for  
help. Should I get a key from  
Henry, and give to Cornell.?

Please let me know as soon  
as possible.

Thanking you very much  
Charles T. Hepworth
